

MUHAMMAD DANIYAL TALLAT

Full Stack Software Engineer

• Lahore, Pakistan • daniyaltallat0@gmail.com • +923164257645 • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer with 1.5 years of production experience building scalable, high-performance applications from frontend to backend. Skilled in React, Next.js, Angular, Node.js, Express and Django (DRF), with solid command of MySQL, MongoDB, Redis, GraphQL and REST API design. Strong grounding in OOP, data structures and DBMS, with a focus on clean, maintainable code and full ownership of every feature, from database design to deployment.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, HTML5, CSS3

Frontend: React.js, Next.js, Angular, Redux, Vite, Tailwind CSS, ShadCN UI, Radix UI, Responsive Design

Backend: Node.js, Express.js, Django, Django REST Framework, FastAPI, REST API design, GraphQL, Rate Limiting

Databases & ORM: MySQL, MongoDB, Redis, Prisma ORM, Mongoose, Schema Design, Query Optimization

Auth & Realtime: JWT Authentication, Socket.io, Nodemailer, Multer, JSPDF

Cloud & DevOps: AWS, Docker, CI/CD Pipelines, GitHub Actions

Tools: Git & GitHub, Postman, VS Code, MySQL Workbench, MongoDB Compass

Core Concepts: OOP, Data Structures & Algorithms, DBMS

Practices: Manual SQA Testing, Agile/Scrum, Sprint Planning, Code Reviews, Role-Based Access Control

WORK EXPERIENCE

Software Engineer Intern, [Devsinc](#), Lahore

Aug 2026 – Present

- **[Agents Anywhere](#):** Contributing to an applied AI platform that helps mid-market and enterprise companies turn their knowledge into AI tools, agents and automated workflows, with human approval on sensitive actions.
- Built the client intake framework and dossier generation, connectors, plugins, MCP skills and Orbit features, and set up AWS deployment with GitHub Actions CI/CD.
- **[VeriCasa](#):** Contributed to an AI-powered legal-tech platform for real estate agencies, law firms and notaries in the Portuguese and US markets, running 100+ of automated legal cross-checks and generating contracts in seconds.
- Developed full-stack features across document analysis, contract generation and KYC compliance workflows, with REST APIs, encrypted document storage and GDPR-compliant data handling.

Junior Software Developer, [Directorate of Information Technology](#), GCU

May 2025 – May 2026

- **[GCU LMS](#)** Contributed to core modules of the university's main platform, serving 10,000+ students, faculty and staff, using Angular, Node.js, Express and MySQL, and built the Summer Enrollment Module, automating registration for ~1,000 students per cycle.
- Built the Teachers Billing Module, replacing a 3-month manual process with an online system for 1,000+ faculty, and developed the Teacher Evaluation Module, while contributing to attendance tracking, eligibility checks and grading with automated student progress reports, role-based access and PDF report generation.
- **[GCU Societies Portal](#):** Built from scratch with 7-role Role-Based Access Control (RBAC), society registration, event approval workflows, member management and society points tracking.
- Optimized MySQL queries and indexing on high-volume enrollment data, reducing slow-query retrieval times across modules.
- **[GCU SFC](#)** (Student Facilitation Center): Developed the core Student Scholarship and Student ID Card modules, digitizing scholarship applications and ID card requests.
- Reduced critical production bugs through manual SQA and regression testing across multiple modules

PROJECTS

Skill Bridge | skillbridge.ddns.net

- Tech stack: React, TypeScript, Node.js, Express, Prisma, MongoDB, Redis, Socket.IO, Stripe, Python FastAPI
- Built an AI-powered freelance marketplace with an autonomous hiring agent that turns a client's idea into structured scope, budget, tech stack and timeline.
- The agent then matches and ranks freelancers, negotiates with them, and generates the final contract.
- Implemented role-based access (client, freelancer, admin) with real-time chat, reviews and blind reviews.
- Integrated Stripe-based escrow payments for secure transactions across the project lifecycle.
- Built a bidding system, skill tokens, jobs browsing, and dispute/conflict resolution for a smoother freelancing process.

Health Connect | health-connect-super.vercel.app

- Tech stack: React, TypeScript, Vite, Node.js, Express, Prisma, MySQL
- Built features for a multi-role healthcare management platform serving admins, clinics, front desk staff and super admins, covering appointment workflows, front desk management and a billing interface, with role-based dashboards and protected navigation.
- Developed REST APIs with Prisma ORM and JWT-based authentication and authorization, documented with Swagger/OpenAPI, and integrated the React frontend with the backend through Axios, deployed on Vercel.

Lead Management System | github.com/Daniyal00001/Leads-management-system

- Tech stack: Django, Django REST Framework, PostgreSQL, Django Templates, AJAX
- Built a CRM-style lead management engine that tracks sales leads through multi-phase technical evaluation to final sale conversion, with phase accept/decline workflows between teams.
- Role-based access control for Business Development, Technical Manager and Engineer roles, with generic comments supporting image attachments across leads and phases.
- Automated commission calculation on converted sales, removing manual tracking.

The College Periodical, GCU | thecollegeperiodical.com

- Tech stack: Next.js, React, Tailwind CSS, Node.js (Next.js API Routes), MySQL, JWT, Supabase, Nodemailer
- Built a full-stack academic publishing platform where authors submit articles anonymously and publish them through a peer-review workflow, from reviewer feedback to final publication.
- Implemented separate Reviewer and Super Admin portals with role-based access control, where admins manage reviewers, submissions and the publication process.
- Secured the platform with JWT authentication, bcrypt password hashing and protected admin API routes, and added email notifications for review updates, deployed on Vercel.

EDUCATION

BS (Hons) in Computer Science, Government College University, Lahore | 2022 - 2026 | CGPA: 3.14

FSc Pre-Engineering, Punjab College of Science, Lahore | 2020 - 2022 | Marks: 961/1100
